(1×15=15)

Software revolution has surpassed all other revolutions by playing a cardinal role in almost every branch of human activity viz., education, health care, services, the railways, the civil aviation, banking, insurance, manufacturing, government, media, entertainment, defense services and wide range of other sectors. History has been witness to a revolution that has transformed human life and its day-to-day activities beyond description. Several global players have made it possible for us to become part of this global village. The fact that India is making this digital revolution happen, must make every Indian proud of his country, its great reservoir of talent and kind of leadership endowed with a futuristic vision.

Not to be left behind at any cost in the crazy race for a pride of place in 'Global village' India too had put in efforts to reach to front line in information technology. Software technology parks and cyber towers dot the landscape in Thiruvanthapuram, Bangalore, Chennai, Hyderabad and other cities. The in thing now is, digitization of information which has changed the way we work, play, communicate and live. Once information is digital, it can be shared, duplicated, transferred and edited with ease and it is this synergy that would revolutionize every sector of the economy.

India has done very well in the field of software exports as well as export of IT enabled services to all rich countries including USA, UK, Germany, Japan etc., the records are enviable. The entire world is now moving towards E-commerce and E-business. By 2008, India would contribute nearly 4% to 5% of the total E-commerce business. Says Mr. Jayakrishna, Secretary, Union department of I.T. it is now ten years since Microsoft has been operating in India. Its CEO

Mr. Gates visited India first in 1997 and made his second visit in September 2000, so many things have been seen within span of 3 years, Gate has hailed India as an IT super power and was all praise for the high cu
